

The Madi Lab (www.asafmadilab.com) is looking for M.Sc., and Ph.D., computational biologist positions. We are interested in molecular signaling that occurs following immune cell interactions or immunotherapies within the tumor micro-environment. We are utilizing single cell proteomic and transcriptomic technologies together with in vitro and in vivo experimental models hand in hand with advanced computational methods.

Interested applicants should send their resume to asafmadi@tauex.tau.ac.il
